

**Figure 3.3 Student and Stakeholder Focus Results (Course Evaluations)**

Walker School Course Evaluations				
Goal	Process/Measurement instrument	Current Results	Analysis of Results	Action Taken
Satisfaction rate > 3.0 for all categories.	Course Evaluations administered online through courseval for every course offered.	Goal met for past 4 years.	Result rates are fairly strong across all years and well within benchmarked averages for online evaluations. The 3 questions measured indicate an overall positive perception of individual instructors. This holds true across all campus types which show very similar results.	The Walker school is continuing to expand mechanisms to support instructors and ensure a positive learning experience for students. A revised survey that is shorter and demonstrates a greater focus on student experience has been implemented beginning with a pilot in Spring 2 of 2018. This may provide additional information as well as a better sense of what students want in their learning environment.
