

Figure 3.3 Student and Stakeholder Focus Results (OIE Student Outcomes Survey)

<i>OIE Outcomes Survey – Walker School Student Overall Success Rate</i>				
Goal	Process/Measurement instrument	Current Results	Analysis of Results	Action Taken
90% Success Rate for Grad, Undergrad and Overall students.	Office of Institutional Effectiveness Student Outcomes Survey administered upon student completion of classes throughout the following year.	Most recent results from Summer 2017 indicate that the goal has been exceeded for the past couple of years.	This is a positive indicator that students are able to apply what they learn to their professional goals.	Student professional success is a key performance indicator for the Walker School. We will continue to benchmark curriculum so that it is current and relevant and ensure that students have resources to support their professional aspirations.
<i>OIE Outcomes Survey – Walker School Student Prepared for Career</i>				
90% Strongly Agree or Mostly Agree with the statement "My Webster Experience Helped Prepare Me for or Advance in My Career"	Office of Institutional Effectiveness Student Outcomes Survey.	AY 1516, which is the most recent year of data reported from Fall 2017 indicates that the goal was met overall, exceeded for grad and not met for undergrad.	Undergraduate numbers dropped 6 percentage points in the most recent year. Career preparedness is an area of concern.	We plan to add a career course to the undergraduate curriculum. Hopefully, career planning early in their studies will lead to an increased focus in this area.
